**Artist Statement:** *"I want my work in clay to represent growth and accomplishment, in which I believe reminiscence and nostalgia play a part. I rely on texture and color to create a sense of motion and time in my work. By exploring and creating vessels kept within arm's reach, I hope to communicate how an object's significance can grow and change depending on the path of a person's life. Through form and surface my goal is to communicate a sense of home and memory but also to evoke that feeling of wanderlust that has informed my own life and visual sensibilities."*
